## Display Screen Equipment (DSE) Assessments

- pat testing
- fixed wire testing
- thermal imaging
- asset tracking
- it audits
- energy audits
- risk assessments
- dse assessments**
- cable management
- pat training
- asset management software
- it auditing software
- pat hardware
- labels & accessories

# Helping to reduce the strain

## HAVE YOU GOT STAFF WORKING FROM HOME?

## DO THEY WORK WITH DISPLAY SCREEN EQUIPMENT?

Do they comply with the Health & Safety (Display Screen Equipment) Regulations 1992, as amended by the Health & Safety (Miscellaneous Amendments) Regulations 2002? The DSE Regulations came into force in 1993 to implement a European Directive, No 90/270/EEC of 29 May 1990, on minimum safety and health requirements for work with DSE.

## WHAT IS DSE?

Display Screen Equipment (DSE) is a device or equipment that has an alphanumeric or graphic display screen, regardless of the display process involved; it includes both conventional display screens and those used in emerging technologies such as laptops, touch-screens and other similar devices.

## WHY ARE ASSESSMENTS IMPORTANT?

Computer workstations or equipment can be associated with neck, shoulder, back or arm pain, as well as with fatigue and eyestrain.

Surveys have found that a high proportion of DSE workers report aches, pains or eye discomfort. These aches and pains are sometimes called upper limb disorders (ULDs), which can include a range of medical conditions such as RSI. Most of these conditions do not indicate any serious ill health, but it makes sense to avoid them as far as possible.

The Health and Safety (Display Screen Equipment) Regulations 1992 aim to protect the health of people who work with DSE. The Regulations were introduced because DSE has become one of the most common kinds of work equipment.

That doesn't mean that DSE work is risky – it isn't. ULDs can be avoided if users follow effective practice, set up their workstations properly and take breaks during prolonged use. By just taking a few simple precautions, work with DSE can be more comfortable and productive.

This assessment covers the DSE Regulations only. Employers should ensure that they also comply with general duties placed on them by other health & safety legislation (see the Section on Workstation Risk Assessments).

## OUR REPORT

We produce a 6 page report covering your Company-owned items such as:-

- Display Screen
- Keyboard
- Mouse (or Trackball)
- Laptop
- Software
- Furniture
- Environment

## WHY USE US?

- Years of experience
- Reliable and convenient service
- City and Guilds qualified engineers
- £10 Million public liability insurance
- ISO9001 registered
- British Safety Council members
- Safe Contractor approved
- Government Trust Mark endorsed
- ConCom registered
- Full Inspection report and data provided

## Years of experience - Trusted and Accredited

Other questions asked relate to:-

- Any problems the User has working with their DSE
- Any discomfort or other symptoms which they attribute to working with their DSE
- Awareness of their entitlement to eye and eyesight testing
- Whether or not they take regular breaks away from their DSE

The assessment takes approximately 75 minutes on site plus a further 75 minutes off site to produce the final report. The Report is sent to you electronically in pdf format.

### THE COST

More than 300 home-based staff £165 per assessment

Less than 300 home-based staff £175 per assessment

The cost is per assessment but includes all travel and accommodation within England (mainland), Scotland (mainland) and Wales. Northern Ireland, the Scottish Isles, Isle of Wight, Isle of Man and any other locations outside of the UK mainland would attract an additional cost to cover air fares, hotel costs and any unavoidable surcharges.

Portable appliance testing on any Company-owned electrical equipment used by the home-based staff at their home is included in the price provided the testing is carried out at the same time as the risk assessment.

The schedule of visits is arranged in the most cost-effective and efficient way so that whenever possible at least 2 home workers per day will be assessed.

Because of the geographical spread of home workers it is not always possible to do that of course, but that is what we aim to achieve. To avoid fruitless visits, all appointments are pre-arranged with the individual home worker(s).

Trusted and Professionally  
Accredited

We are:

Government Trust Mark endorsed  
ISO registered and certified  
A member of the British Safety Council  
Safe Contractor Approved  
Concom registered  
Fully insured with £10 Million liability cover

Experienced Inspectors

All of our Inspectors are trained to a high standard and have many years of experience performing Risk Assessments.

Electronic Reporting

All documentation is provided electronically to ensure you receive your test results as quickly as possible - it also helps the environment by saving paper, electricity and carbon emissions from vehicles used to deliver post.

PAT TESTING

ASSET TRACKING

FIXED WIRE TESTING

MANAGEMENT SOFTWARE

AND MORE

The DataTrak Head Office is located in Milton Keynes. Our engineers, however, are located around the UK - hence our nationwide service.

Although a relatively young company, the Board and Senior Management of DataTrak can offer a wealth of experience in facilities management, software design & development, IT management and providing service to customers.

We offer not only a range of quality services and products but also a very competitive pricing structure. Our Company policy though is simple - a total commitment to quality customer service at all levels.

Safety is a core value of our company. All DataTrak people, from leadership down to everyone in the field, personally challenge the notion that injuries will occur and hold the conviction that every accident is preventable. That's why our safety performance is second to none.

Our Customer base straddles the whole spectrum of commerce and industry - both private and public. For a number of years DataTrak has been recognised as a leader in our field. We are proud of our past but are looking to the future.
